

# IOS: SET UP THE CLOUD WORKSPACE® CLIENT

This guide provides instructions for iOS Users installing the Microsoft RDP client. Please note that you do not need to set up the Microsoft RDP client in order to access the Cloud Workspace via a HTML5 enabled browser – you would simply navigate to [login.cloudjumper.com](https://login.cloudjumper.com).

## INSTALLING THE RDP CLIENT ON IOS DEVICES

The Microsoft RDP client is an easy, one-time install that will allow you to access the Cloud Workspace via RDP. Follow these simple instructions to download and install the Cloud Workspace RDP client.

- Open the App Store and search for **Microsoft Remote Desktop Client**, then download it
- Open the **Microsoft Remote Desktop Client** and tap the + sign to continue

- Tap **Add PC or Server** to continue

- Tap **PC Name** to continue

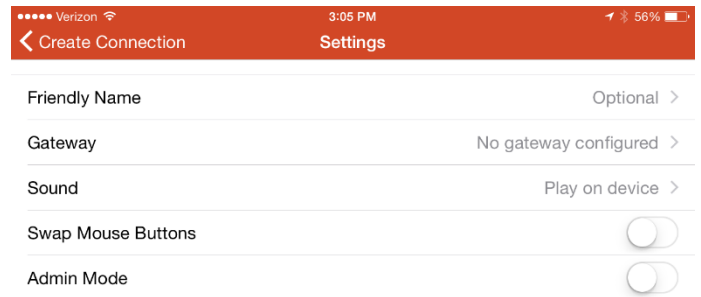

- Enter the PC Name (aka Server Name) provided by CloudJumper, then tap **Done** to continue

## IOS: SET UP THE NWORKSPACE CLIENT

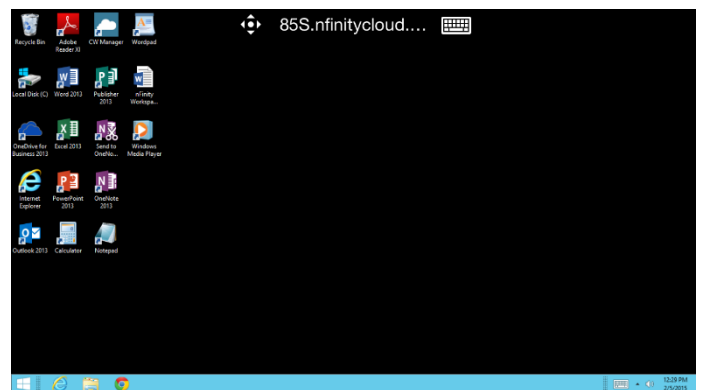

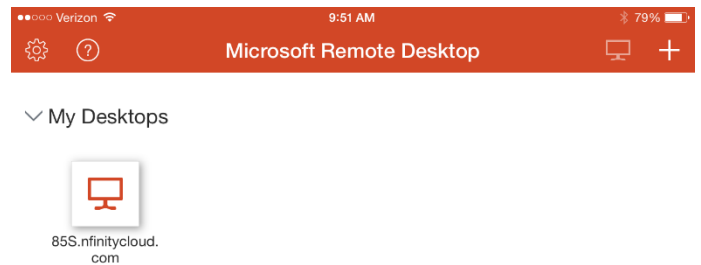

- Tap **Settings** to continue
- Tap **Gateway** to continue
- Tap **Add Remote Desktop Gateway** to continue
- Tap **Server Name** to continue
- Enter the Gateway server provided by CloudJumper and tap **Done** to continue
  - Name your Gateway if desired, but do not enter credentials here
- Tap the **Save** to continue

## IOS: SET UP THE NWORKSPACE CLIENT

- Tap **User Name** to continue
- Tap **Add User Account** to continue
- Enter the User name and Password provided by CloudJumper, then tap **Save** to continue
- Tap **Save** one more time to save the connection
- The connection to the Cloud Workspace is complete - tap the connection to launch the Cloud Workspace
- The Cloud Workspace will appear as it does below

The RDP client is now set up correctly. You will not need to do this again – this is a one-time install.
